

WORKS NOTIFICATION

Upcoming Sewer Infrastructure Works

To maintain a quality sewerage service that continuously meets the needs of our growing community, Unitywater is refurbishing the **Sewer Pump Station at Ed Webb Park, Sunshine Beach.**

What we are doing

- Works to fully refurbish the Sewer Pump Station at Ed Webb Park, Sunshine Beach are scheduled to commence in late January 2024.
- These works will take up to 12 weeks to complete subject to weather and construction conditions.
- Construction will include high pressure cleaning inside the pump station well and replacement of all components inside the well.
- Construction also includes replacement of the electrical switchboard, installation of a new odour control unit and other ancillary works.

What to expect

- Noise from work vehicles and general construction activities can be expected between 7am and 6pm Monday to Friday.
- The sewer pump station will run on electric bypass pump for approximately 6 weeks during the works. These pumps will operate 24/7 and emit similar noise and vibration to the existing pump station.
- Diesel bypass pump will run during replacement of the electric switchboard which is expected to take one day. This pump will emit a higher level of noise and vibration than the electric pump.
- High pressure cleaning will be conducted as part of the refurbishment. This is expected to take several days. An increased level of noise and vibration can be expected whilst this cleaning takes place.

- Every effort will be made to complete the switchboard replacement and high pressure cleaning works as quickly as possible to minimise inconvenience to local residents.
- Work schedules and methodology may be subject to change in response to weather or construction conditions to ensure the safety of our workforce and the community.
- There will be no impact to the existing beach access for pedestrian or vehicles, however, ensure the safety of motorists and pedestrians, we will have traffic signs in place during this time, where necessary.
- A map of the construction area is provided below.
