## Wastewater Treatment Plant works

Wallum Lane, Noosa Heads

### About this project

To ensure we continue to deliver safe and reliable wastewater services that meet our community's needs, Unitywater is undertaking essential renewal and maintenance works at the Noosa Wastewater Treatment Plant.

The works to this existing infrastructure will improve the capability of service during wet weather events in the Noosa region and ensure long-term wastewater service delivery to the local community.

### What we are doing

Works at the Noosa Wastewater Treatment Plant have recommenced following the Christmas shutdown period.

All construction will remain within the Plant site, at 2 Wallum Lane, Noosa Heads, and there will be minimal impact on neighbouring properties. Most of the work will take place during the day, between **6:00 am** and **6:00 pm**, **Monday to Friday**.

In some situations, we may need to carry out work on weekends and evenings. We will notify the community impacted before any night work occurs.

### What to expect

Works have been progressing well; the electrical conduit relocation and access road works have now been completed.

The next stage of the renewal and maintenance works include:

- Detail excavation and preparation for the new flowmeter and bypass chamber
- Installation of pipes and fittings for the new weather bypass
- Future work includes a new switch room and associated civil works, including installation of a new UV system

### Impacts

Noise/dust - varying levels of noise and dust from construction machinery including the use of a crane, an increase in vehicle movement along the service road (Rotary Way). We'll minimise this where we can.

**We would like to take this opportunity to thank you for your patience while we complete this essential work**
